

CORPORATE FACT SHEET

About XRoads Networks

XRoads Networks is the leading developer of Unified Bandwidth Management appliances. UBM is the name for a new emerging trend in network resource management, monitoring, and control. Our UBM appliances provide multi-WAN network load balancing, VPN tunnel reliability & optimization, and network traffic shaping & prioritization.

Founded in 2001, XRoads Networks, a private company located in Irvine, California, has been growing at a double digit rate since 2004. Our products are integrated in to some of the largest Fortune 500 companies, as well as thousands of small to mid-sized organizations in over 30 countries. We have a proven track record for delivering high performance and highly reliable bandwidth management solutions.

Value Proposition

- ✦ Supports a Variety of Bandwidth Management Solutions
- ✦ Enterprise-Class, Solid State, and Expandable Hardware
- ✦ A Broad Range of Cost Effective UBM Appliances

Technology

The XOS (XRoads Operating System) is a modular network operating system that provides a highly stable and secure base from which our development team has created the following core technologies: Vector Routing, Best Path Routing, ActiveDNS, MOD (Multi-Level Outage Detection), AutoFlow, VirtualNAT, Tunnel Multiplier, Transparent Proxy, Auto-Classification, and our Virtual Technician. XRoads Networks is the holder of multiple pending patents.

Products

- Edge2WAN** Simple to configure WAN management appliances designed to provide the small to mid-sized business or branch office with enhanced network management capabilities.
- EdgePRO** Mid-sized unified bandwidth management appliances which provide an extensive set of network management, monitoring, and control capabilities (highly scalable, up to GigEthernet throughput).
- EdgeXL** Enterprise class appliances designed with high throughput route processing power for large scale deployments. The EdgeXL product line supports 1000's of users, is feature rich and delivers a quick ROI.

Customers

As of January 2008, XRoads Networks, in strong cooperation with its channel partners, has deployed thousands of units in over 30 countries and over 200 value added resellers representing the following verticals markets: Energy, Financial, HealthCare, Education, Legal, E-Commerce, Business Services, ISP, and Government.

Deployments

- ✦ Thousands of units deployed
- ✦ Network load balancing with Best Path Routing, VPN tunnel reliability and optimization, VPN tunnel binding, multi-WAN traffic shaping, VoIP assurance, and application acceleration.
- ✦ Edge2WAN launched March 2003, EdgePRO launched October 2004, EdgeXL launched January 2006
